Principal Investigator Architectural Historian Cultural Resource Analysts Evansville, Indiana 2011 – Present		Senior Historic Preservation Planner Delaware County Planning Dept. Media, Pennsylvania 2008 – 2011	
		Graduate Research Associate Center for Historic Preservation Muncie, Indiana 2006 – 2008	
<p>Alan Higgins is an architectural historian and preservation planner with a B.S. and M.S. in Historic Preservation. Having worked in both the private and public sectors, Alan is attuned to the importance of producing high-quality, usable documents that facilitate project goals, whether they be revitalizing a local community or mitigating adverse effects to historic properties. Intimately familiar with the National Historic Preservation Act and the Secretary of the Interior's Standards for the Treatment of Historic Properties, Alan has participated in a diverse range of projects – engaging complex issues of both historic resource management and regulatory compliance – and is particularly adept at helping communities, organizations, and agencies promote, protect, and celebrate their historic resources.</p> <p>At CRA, Alan serves as Director of Architectural and Cultural History and is responsible for handling the administrative functions related to the successful and efficient operation of the department. He also routinely completes specialized documentation such as historic preservation plans and HABS-level recordation and assists state and Federal agencies, architects, engineers, and planners in meeting complex cultural resource needs. Prior to coming to CRA, Mr. Higgins served as a Senior Historic Preservation Planner in the greater Philadelphia region, carrying out the Section 106 responsibilities of the County and working with other planners and municipal leaders to craft revitalization plans, historic property maintenance manuals, and design guidelines. Alan has also worked in close association with entities such as Indiana State Museum and Historic Sites in developing complex historic structures reports for state-owned properties.</p> <p>Alan also has recognized experience and expertise in the identification, documentation, and preservation of post-1941 architecture. He has developed architectural terminology and building typologies for these resources and completed thematic contexts and resource studies for the period. For more than five years, he has presented his work at the local, regional, and national levels, including at meetings of the National Association of Environmental Professionals, National Trust for Historic Preservation, Transportation Research Board, and numerous local and state agencies. Through his work, Alan remains dedicated to cultivating an ethic of understanding and consistent, appropriate treatment for our recent heritage.</p>
