Derrick T. Maurer	Field Technician IV	
Email: dtmaurer@crai-ky.com **Phone:** (812) 454-9204	**Specific Duties Recently Performed:** • 2023–2024: Field Technician III • 2025–present: Field Technician IV	**Education and Training:** • B.S., Anthropology, Minor in Studio Art, University of Southern Indiana (USI) – May of 2020 • M.S., Anthropology, Florida State University - ABT

Experience Summary Information		
Archaeological Field Technician III/IV Cultural Resource Analysts, Inc. 2023–present	**Graduate Assistant** Florida State University, Department of Anthropology 2020–2023	**Archaeological Field/Lab Technician** The Center for Archaeological Investigations (CAI) May–August 2019 Cultural Resource Analysts, Inc. 2019–2020

Derrick Maurer has gained archaeological experience across the United States in various regions since his introduction into the field, including work in Indiana, Kentucky, Tennessee, Illinois, Michigan, Florida, South Carolina, Missouri, and Oklahoma. He is experienced in both prehistoric and historic archaeology having helped record sites with both components throughout the Midwest and Southeast regions, as well as having undergraduate and graduate coursework addressing the archaeology of North America. During his time in CRM, Mr. Maurer has worked on over 50 phase I surveys and has also had the opportunity to participate in a number of phase II excavations. While at USI, he was privileged to participate in a geophysical survey of the Mann site (12PO2) in southwestern Indiana. This experience sparked an interest and led to him initiating an Independent Study for his last semester at USI where he conducted a magnetometer survey in search of an old school house on Evansville's east side. He also has an interest in historic archaeology and is working on a thesis focusing on the archaeological materials recovered from a boarding house in Charleston, South Carolina. The thesis is a comparative study that aims to bring the lived-experiences of mid-eighteenth- to mid-nineteenth-century residents, particularly women and individuals of the lower class, in Lodge Alley, Charleston, South Carolina into the current social memory. Along with the comparisons of domestic deposits of residences in Lodge Alley versus others from more affluent areas, the Lodge Alley deposit (representing a dual-function [i.e., residential and commercial] site) is compared with those produced by an eighteenth- through nineteenth-century tavern/eating establishment and those through residences known to be associated with sex-work.

Employment and Task History:

2019: Field Technician, Center for Archaeological Investigations, Carbondale, Illinois.

- Participated in phase I surveys and phase II excavations throughout the Hoosier National Forest.
- Sites surveyed/excavated included both prehistoric and historic components.
- Participated in historical research related to specific sites and post-field write-ups.

2020: Field Technician. Cultural Resource Analysts, Inc., Evansville, Indiana.

- Began as an intern during the 2020 Spring semester and then as a field technician through the summer.
- Constructed and submitted site profiles.
- Photographed assemblages for site profiles and cataloging purposes.
- Lab work consisted of cleaning and sorting the artifacts as well as inking for cataloging purposes.

- Phase I surveys in southeastern Indiana and northwestern Kentucky as well as a phase II excavation at a multi-residential site (12VG2012) in Evansville, Indiana.

2020–2023: Graduate Assistant, Florida State University (Department of Anthropology), Tallahassee, Florida.

- Responsible for grading assignments, papers, and exams.
- Met with students during office hours to address questions and concerns regarding the course material.
- Supervised student projects (e.g., museum exhibit at the Anthropology department).
- Assisted professors and staff with organizational and maintenance tasks throughout the department.

2023–present: Field Technician, Cultural Resource Analysts, Inc., Evansville, Indiana.

- Participated in over 50 phase I surveys in Indiana, Kentucky, Illinois, Tennessee, Oklahoma, Michigan, and Missouri.
- Participated in the phase Ia survey and phase II NRHP evaluations for a proposed quarry expansion in Salem, Kentucky. The phase II work consisted of test units, feature excavation, and trench profiling on sites with components ranging from the Archaic period through the mid-twentieth century.
- Lab work consisted of cleaning, sorting, and cataloging.

Additional Training and Experience

- 2018. Participated in a large-scale magnetometry survey of the Mann Site (12PO2), May of 2018
- 2018. Archaeological Field School: University of Southern Indiana, Summer of 2018
- 2019. Independent Study in Anthropology: University of Southern Indiana. Conducted a magnetometry survey at the site of the Terry school, a nineteenth-century one-room schoolhouse located on the eastside of Evansville, Indiana.
- 2006. Awarded Eagle Scout by the Buffalo Trace Council, Evansville, Indiana. Built a handicap accessible concrete ramp and fishing area on the bank of the Bluegrass Fish and Wildlife Area in Evansville, Indiana.

Annual: Occupational First Aid, CPR, and Bloodborne Pathogen
