	<ul style="list-style-type: none"> laboratory work preparation of artifacts for curation field work 	<ul style="list-style-type: none"> B.A. Anthropology, Florida Atlantic University, Jupiter, FL 	
Experience Summary Information			
Laboratory Technician	Field Technician	Field and Laboratory Technician	
Cultural Resource Analysts, Inc. 2013 - present	Cultural Resource Analysts, Inc. 2012 - present	Various Companies Southeastern United States, 2005-2010	
<p>Ms. Bourget has served as a laboratory technician for the CRA, Louisiana office since January of 2013. Prior to this, she worked as a field technician for the CRA, Louisiana office along with various other cultural resource firms throughout the Southeast, California, West Virginia, and Puerto Rico.</p> <p>Since starting as a laboratory technician at CRA, Ms. Bourget has helped clean, sort, analyze, and catalogue historic and prehistoric artifacts recovered during field investigations. She has also worked with the Louisiana Division of Archaeology Curation Facility to prepare artifacts for curation.</p> <p>As a field technician, Ms. Bourget has contributed to a wide variety of historic and prehistoric, phase I, II, and III archaeological projects. She is experienced in unit excavation, shovel testing, pedestrian survey, site delineation, and trench excavation.</p> <p>Phase I Experience:</p> <p>Ms. Bourget has participated in a number of Phase I projects as a laboratory technician, performing general lab and/or curation work. Examples include the following:</p> <ul style="list-style-type: none"> Processed materials, conducted analysis, and prepared recovered materials for curation for the Ram Terminals proposed 200 acre development in Plaquemines Parish, Louisiana (L12R001). This work addressed materials from the St. Rosalie Plantation (16PL107), an antebellum and post-bellum sugar plantation that was in production from 1831 until the early to mid-twentieth century and a nineteenth to twentieth century site of unknown function (16PL261) along with two isolated finds also consisting of historic materials (X16PLA and X16PLB). Processed materials, conducted analysis, and prepared recovered materials for curation for the Ram Terminals proposed 185 acre development in Plaquemines Parish, Louisiana (L12R002). This work addressed additional materials from the St. Rosalie Plantation (16PL107), an antebellum and post-bellum sugar plantation that was in production from 1831 until the early to mid-twentieth century and a nineteenth to twentieth century site of unknown function (16PL269). Processed materials, conducted analysis, and prepared recovered materials for curation for a 285 acre survey at Camp Minden in Webster Parish, Louisiana (L11L003). This work addressed prehistoric lithic materials and a wide range of historic materials from seven sites (16WE261, 16WE288, 16WE289, 16WE402, 16WE403, 16WE404 and 16WE405) and nine isolated finds. Processed materials, conducted analysis, and prepared recovered materials for curation for a 700 			

acre survey at the Former England Airpark in Rapides Parish, Louisiana (L12P004). This work addressed materials from four sites (16RA692 [McNutt Plantation, a nineteenth-century plantation house and twentieth-century residence], 16RA703 [Weil Site, a row of twentieth-century African-American tenant farm residences owned by the Weil Company], 16RA1504 [twentieth-century tenant farm], and 16RA1505 [mid- to late-twentieth-century tenant farm and twenty-first-century residence]) and one isolated find.

- Processed materials, conducted analysis, and prepared recovered materials for curation for a 297 acre survey for a proposed wetland mitigation bank in Claiborne County, Mississippi (L13D001). This work addressed prehistoric lithic materials and a wide range of historic materials from 10 sites and two isolated finds.

Ms. Bourget has participated in a number of Phase I projects as a field technician. Examples include the following:

- Survey of a proposed 200 acre development on the west bank of the Mississippi River, Plaquemines Parish, Louisiana (Ram Terminals, L12R001).
- Survey of multiple tracts in support of the restoration of the Everglades, St. Lucie County, Florida.
- Survey of a gas pipeline corridor in northern and eastern Arkansas and western Mississippi.

Phase II Experience:

Ms. Bourget has participated in a number of Phase II projects. Examples include the following:

- Large prehistoric occupation site, Orange County, California.
- Unit excavation of multiple pre-historic sites, some of which included historic components in support of the construction of a large planned community, Beaufort County, South Carolina.

Phase III Experience:

Ms. Bourget has participated in a number of Phase III projects. Examples include the following:

- Mitigation of an extensive post-contact Tequesta occupation site, Miami-Dade County, Florida.
- Mitigation of a large multi-component prehistoric site on the north bank of the Kanawha River, Kanawha County, West Virginia.
- Mitigation of a large prehistoric occupation site, Carteret County, North Carolina.

Laboratory and Additional Experience:

- Worked for the Charlotte Harbor Department of Environmental Protection in Punta Gorda, Florida on a large shell mound, documenting the archaeology of the mound and damage done to the site by looters during the 1970s and 1980s. She also contributed to the washing, sorting, and cataloguing of recovered artifacts and prepared shell samples for carbon-14 dating.
- Aided in the stabilization and preservation of a large *batéy* ball court site near Ponce, Puerto Rico.
- Participated in a six-week archaeological field school in Salango, Ecuador.
